MY SPACE

DOOMSDAY

So I saw in a feature film
Life on earth was on its brim.
As 2012 came to its end
People all over the world started to send.

"The world as we know is at its bay.
It is really the Doomsday?"

The Mayan calendar ended up
Everyone around the world was looking up.
Will the sky come falling down?
Or will the mayhem be underground?

Afraid they all stand to pray
It is really the Doomsday.

Humans have made Earth a living hell
Doesn't global warming ring a bell?
Polar ice caps are melting away.

Everyone is falling prey.

To the luxuries and joy of the
modern day,
Man forgot the nature' way.
But it's high time that we move away

From this greed, money and mod-
ern fray
Because with humanity's hair turn-
ing grey
There can't be a worse Doomsday !!
