

Wonderful volume full of amazing animal facts

OLIVIA ROCKWELL

CLASS 3 D,
LAXMAN PUBLIC SCHOOL, HAUZ KHAS

I recently read a book titled **Unlock The Animal World: Incredible Facts for Young Superheroes**, written by Ingrid Newkirk. It is a wonderful book filled with amazing facts about animals from around the world.

Since I enjoy reading about animals, I was excited to come across this book that highlights how animals are intelligent, caring, brave, and full of surprises.

The volume also reminds us that we should always be kind to animals and must do everything possible to protect and conserve nature.

The book comprises chapters about a wide variety of themes such as animal migrations, sounds, love, friendship, work and play. Every chapter features interesting animals and tells real stories about them. For example, one very interesting fact that I learnt was that sea turtles can travel thousands of kilometres and still find their way home.

I also discovered that elephants care for their families, dolphins communicate with each other, and birds sing for many different reasons. Every chapter helped me learn something new about the animal world.

The author's writing style is simple, friendly and easy to understand. Even though the book is full of facts, it is never boring. The stories are interesting and make learning enjoyable. I also liked the beautiful black and white pictures because they helped me imagine the animals.

My favourite parts in the book were those about how elephants help their families and how dogs seem to have the power of understanding

people's feelings.

The short sections titled **Did You Know?** were so much fun because they shared bonus facts that made me curious to learn more.

The main message of the book is that animals have feelings just like humans do and that they deserve our love, care and respect.

I really enjoyed reading this book because I am an animal lover and enjoy learning new things. Some facts surprised me and made me think differently about animals.

I now understand that animals too have families, friendships and emotions just like we humans do.

After reading this book, I am inspired to be kinder to animals by keeping my surroundings clean, giving water to birds during summers and helping stray animals whenever it is possible.

Overall, **Unlock The Animal World** is an excellent book that is both educational and enjoyable.

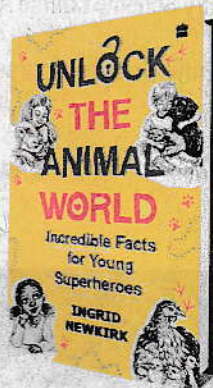

It teaches important lessons about kindness, friendship, teamwork, and caring for nature.

There are many young children who can learn a lot from this book, specially how to treat animals around

them with dignity.

These beautiful creatures help the world function in innumerable ways. The least we can do to thank them is by paying attention to our surroundings and become the voice of the voiceless.

I would happily recommend this book to all children who love animals and enjoy learning interesting facts about them. I am sure they will enjoy reading it as much as I did.
